

Extracurricular Activity: Music and Instrument Learning

We believe that music is a wonderful source of fulfillment for children. That's why we offer an extracurricular program dedicated to learning musical instruments, giving each child the opportunity to discover, play, and express themselves through music.

An Enriching Musical Journey

Our lessons allow students to explore musical language, develop their listening skills, and learn the basics of music theory while practicing an instrument of their choice:

- Piano** – Enhancing coordination, reading sheet music, and melodic expression.
- Violin** – Developing rhythm, concentration, and precision in interpretation.
- Guitar** – Encouraging creativity, accompaniment skills, and learning chords and melodies.

A Teaching Approach Adapted to Every Level

- Introduction (Beginners)** – Exploring sounds, rhythms, and first notes.
- Improvement (Intermediate)** – Developing technique and musical interpretation.
- Artistic Expression** – Encouraging solo and group performances to build confidence.

The Benefits of Music for Children

- Enhances concentration and memory
- Develops discipline and patience
- Strengthens creativity and self-confidence
- Brings joy and a means of expression through music

Concerts and Performances

Throughout the year, students will have the opportunity to participate in shows and recitals, sharing their passion with their peers and families.

 **Enrollments open all year round**
